

# MILICENT MAPIMHA

DevOps Engineer · Cloud Engineer

Atlanta, GA | 678-837-9792 | cmapimha@outlook.com

## PROFESSIONAL SUMMARY

Azure-focused DevOps and Cloud Engineer with 3+ years delivering scalable CI/CD infrastructure on AKS and Azure DevOps. Achieved a **25% improvement in system uptime** through proactive Application Insights monitoring and early issue resolution. Experienced in zero-downtime Kubernetes deployments, Docker containerization, and Git-based release workflows. Proven ability to support Agile development teams, streamline deployment pipelines, and maintain high-availability production environments on Microsoft Azure.

## SKILLS

**Cloud Platforms:** Azure (AKS, Resource Groups, App Insights, Front Door, CDN)

**CI/CD & Automation:** Azure DevOps Pipelines

**Monitoring & Observability:** Azure Monitor, App Insights, Grafana, Prometheus

**Databases:** MS SQL Server, MySQL

**AI Tools:** Microsoft Copilot, Claude

**Containerization & Orchestration:** Kubernetes, Docker

**Version Control:** Git, Azure DevOps Repositories

**Tools:** Visual Studio Code, Jira

**Operating Systems:** Windows, Linux

## PROFESSIONAL EXPERIENCE

### Cloud Engineer I

Barbri Inc — Fully Remote

March 2023 – April 2026

- **Improved system uptime by 25%** by monitoring cloud performance metrics in Azure Application Insights and resolving issues proactively before user impact.
- Designed, implemented, and maintained **10+ Azure DevOps CI/CD pipelines**, reducing manual deployment effort and accelerating release frequency across dev and production environments.
- Managed Azure DevOps repositories and executed Git workflows — branching, merging, and versioning — ensuring clean, traceable release histories across all projects.
- Served as the primary Jira administrator for DevOps workflows, managing ticket triage, incident tracking, deployment coordination, and cross-functional team collaboration.
- Leveraged Microsoft Copilot and Claude AI to accelerate pipeline development, Kubernetes configuration, and root-cause troubleshooting, cutting resolution time on recurring issues.
- Diagnosed and resolved AKS incidents involving Pods, replicas, and deployments, maintaining **zero-downtime updates** across Dev and Production clusters.
- Provisioned and governed Azure resources — Namespaces, Resource Groups, service connections, and Docker registry integrations — ensuring consistent environment configuration.
- Configured Azure Front Door and CDN to optimize global content delivery, improving load performance for production applications.
- Executed **50+ bi-weekly production deployments** with a strong track record of zero rollback incidents, monitoring cluster health via Grafana and Prometheus dashboards.
- Mentored and supported development teams adopting CI/CD best practices, reducing integration friction and improving deployment confidence.

## DevOps Engineer

October 2020 – October 2022

Performance System Development — Fully Remote

- Delivered end-to-end CI/CD solutions within an Agile team, driving faster and more reliable software releases in an open-source environment.
- Architected Docker and Kubernetes container strategies to decompose monolithic applications into **scalable microservices**, improving deployment flexibility and system resilience.
- Built and maintained automated build and deployment pipelines, **reducing release cycle time** and eliminating manual handoff steps in the delivery workflow.
- Designed multi-environment release strategies and managed Azure Virtual Machines across Dev, Test, and Production, ensuring environment parity.
- Installed and configured IIS and Apache web servers for application hosting and QA testing, supporting multiple concurrent project workstreams.
- Maintained Docker image repositories and established continuous delivery pipelines in collaboration with development teams.
- Investigated and resolved complex cross-stack issues spanning applications, MS SQL databases, and IIS server configurations.
- Provisioned Azure test environments and authored migration plans for legacy application modernization initiatives.
- Implemented automated monitoring solutions to proactively detect environment drift and support scalability requirements.

## IT System Support Administrator

August 2019 – June 2020

Rubin Lubin — GA (concurrent with DevOps role)

- Managed first-level ticket triage, ensuring accurate routing and timely resolution across the support queue.
- Built and maintained internal reporting dashboards, delivering actionable data analysis to cross-functional teams.
- Partnered with global data teams on data quality improvement initiatives, supporting operational decision-making.
- Collaborated with Test, Development, Infrastructure, Security, and Release Management teams to diagnose and resolve system-level issues.
- Delivered informal systems training and supported structured classroom training programs for end users.
- Conducted weekly security audits across networked and standalone systems, maintaining compliance with internal security policies.
- Troubleshoot workstation and server connectivity issues, minimizing downtime and maintaining business continuity.

## EDUCATION

### Bachelor of Computer Information Systems

University of North Georgia, GA

## CERTIFICATIONS

### Microsoft Certified: Azure Fundamentals (AZ-900)

ID: 990241424
